

## **Modern Campus 9/13/2023**

### **Meeting Notes:**

- Emily received the Program Mapper links from Joshua. These links are just for the MJC site.
  - Joe checking with Columbia to see if Columbia is using Program Mapper or something else.
- Emily received the Profile template from Joshua.
  - The developer noticed the search and filter in the left side of the template like we see on the Directory template. The Profile templates are not able to use the search and filter features like the Directory listing do so we will need to remove this from the template.
  - Yosemite also mentioned they will not use the contact cards on the faculty profile pages.
- Joshua is still waiting on an update from Job Seeker to be able to provide the embed code for the Career Outlook section of the Program template.
- Chris/Emily to check with the developer to see if we can add a page parameter that will prevent non-admin users from changing the page title.
- Chris will be the main point of contact going forward.

### Pending Items for Yosemite:

- Embed codes for the Program Highlights and Career Outlook sections from Columbia.
- Embed codes for the Career Outlooks section for MJC.
- The site map for the shell site migration.
